Pre-Installation Checklist

ROOM CONDITIONS

- ☐ Two or three 230V power connections with CEE 7 sockets, secured with a 16A fuse
- ☐ Equipotential bonding
- ☐ Long enough power cables between the electrical outlets and the desired flight simulator position
- ☐ Internet connection
- ☐ Ceiling is suitable for a projector mount
- ☐ Projector mounts are mounted at the ceiling
  (not part of the VIP scope of delivery, can be done during installation)
- ☐ Position of the simulator, the visual and the PCs is defined
- ☐ Position of the PC rack needs to be defined, to ensure proper cable lengths
- ☐ Additional Displays (e.g. for maintenance, not part of the delivery) need to have HDMI or DisplayPort connection
- ☐ Cable channel/guidance from projectors to computer need to be provided and prepared
- ☐ Check back with us if it is possible to drill screws into the floor and ceiling

FURTHER QUESTIONS?

In case you need further help with assembly please write an email with a clear explanation and descriptive photos to our support desk: **support@vier-im-pott.com**
